Dear Customer,

RE: Improvements to HV Electricity Network in and around Alconbury village

I am writing to inform you that we will shortly be working in your area; the work involves replacing High voltage electricity poles.

In order to complete the works and to keep the power interruption to a minimum generators will be fitted for the duration of the works at the Sparrow drive and High street village green substations. We appreciate that the noise produced by the generators could cause irritation and will make every effort to reduce this by fitting sound dampening barriers.

Your electricity supply may be affected at some point during the works. If so, an Advanced Warning letter will be delivered at least 12 days prior; confirming the date/time and if access will be required to the meter position. A reminder letter will also be delivered at least 2 days before.

All staff will carry identification with them.

I am sorry for any inconvenience and thank you for your co-operation.

We will try and keep any disruptions to a minimum.

Yours sincerely

Dan Hales
